

# QuickPAD IR

QuickPAD Technology Corp.

## Teaching Benefits

- With the QuickPAD you'll **work with technology in your classroom** (or where ever you want) and you can have enough processors for all of your students, not just two or three at a time.
- Use the power of a word processor to **help students develop their writing skills**: editing, revising, organizing & clarifying.
- **The QuickPAD is easy to use.** Infrared transfer means simply point and send. You focus on your students and instruction, and not on technology.
- This is technology that **requires no staff development**, no maintenance, or overhead. Pass them out, turn them on and you're on your way.
- With the portfolio Filing System, your **students maintain their own secure writing folder**. All documents within each folder can be named for quick and easy access.
- Critiquing and grading papers that are "word processed" allows you to **focus on the strengths and weaknesses of your student's writing**, not on deciphering. (And it is so much easier to grade a stack of papers!)
- Take the QuickPAD with you to meetings or anywhere you work. **You'll enjoy the simplicity and convenience.**

## Infrared Transfer to Mac or PC

Simple,  
affordable,  
skill-building  
technology for  
today's classroom

**If you're searching for a way to leverage your technology budget** to get more students in front of powerful technology, or if you or your teachers are struggling to schedule time in an overburdened computer lab, or if you're looking for a way to improve writing skills while increasing keyboarding skills, then the **QuickPAD by QuickPAD Technology is for you.**

The QuickPAD is a simple, durable, word processor. It operates on four AA batteries for hundreds of hours, and can hold up to 250 individually named files in ten separate folders. All text is automatically saved in the QuickPAD and files are easily transferred into any writing application in either a PC or Mac with just one keystroke. **Using QuickPAD's infrared technology, you simply point and send.** No more cumbersome cables to hook up. Simple, durable and powerful, the QuickPAD is technology that is right for today's classroom.

QuickPAD Technology Corp.

## ***Infrared Ease***

Just like your TV remote, you just point and press a button...simple. After writing and revising in the QuickPAD - it's time for your students to transfer their work to the MAC or PC. They simply open up any writing program, point their QuickPAD at the computer and press "send file". Within seconds the file has been completely transferred and is ready for final formatting and printing. No software or cables to mess with-just point and press the key...simple.

## ***Write Where You Are***

The QuickPAD supports and enhances your writing and keyboarding program. This is an easy to use, convenient and durable word processor. Students write more and write more often. They take the QuickPAD on fieldtrips, home, or anywhere writing takes place. Utilizing the power of the processor, they evaluate, analyze and revise their work. You and your students focus on contents, not on deciphering handwriting.

## ***Typing Program***

Now every QuickPAD comes with a pre-installed Typing Program! Students learn proper keyboarding techniques in a fun, user-friendly format. This program challenges every skill level from beginner to advanced. Every time the student uses the typing program, the results of the lessons are automatically saved in their folder, making it much easier to monitor progress. At no additional cost, this program is an indispensable tool in today's classroom.

## ***Access Is The Key***

The low cost of the QuickPAD allows the access absolutely necessary for skill development. Daily access (not once each week in a computer lab down the hall) in your classroom at each and every student desk!

## ***Take A Look!***

If you would like to order, have any questions or need a demonstration, call, fax or E-mail QuickPAD Technology Corporation today. Try the QuickPAD **FREE** for sixty days! 1-800-373-8181 or visit our web site at [www.quickpad.com](http://www.quickpad.com) and complete the online evaluation form.

## ***Portfolio Filing System***

Teachers asked for a filing system that was easy to use, but also one that offered flexibility and security. We are pleased to introduce the Portfolio Filing System. This filing system allows each student to have his or her own writing folder (F1-F10). Within their folder, students store their writing assignments by name. This allows students to work on a number of assignments or writing projects concurrently.

With the Portfolio Filing System each student folder can be password protected, allowing students to share their QuickPAD with confidence. The files in their folder cannot be deleted or altered by any other student. This is particularly critical in Middle Schools and High schools with period rotations as well as Elementary schools when sharing QuickPADs among a number of classrooms.

## ***Upgrade your QuickPAD via QuickPAD.com***

From time to time QuickPAD Technology Corp. develops additional functionality of the QuickPAD. Using the Internet and logging onto [www.quickpad.com](http://www.quickpad.com), users are now able to download the latest firmware that resides in the QuickPAD. Use a serial interface from any PC and upgrade the QuickPAD to the latest revision. It only takes 1 minute per QuickPAD.

## ***Specifications***

- Stand alone word processor - create, edit and store 250 text documents
- File transfer by infrared link up to 20 feet away
- Compatible with both PC and Mac, all applications
- Saves up to 70 pages of text in 10 separate folders
- Prints directly to parallel printer
- 4AA batteries for hundreds of hours of use
- Light weight rugged design (1.5 pounds)
- 4 line 40 character LCD display
- Full 86 key laptop keyboard
- Calculator
- Upload & download to and from PC through serial port
- One receiver for PC, MAC or IMAC
- Auto backup - Never loose a file even when batteries die
- Preinstalled Typing Tutor, Spell Check, Word Prediction and Thesaurus
- Downloadable applets available

## ***Every QuickPAD Unit Comes Complete***

- QuickPAD keyboard
- One Infrared Receiver
- All necessary cables
- Carrying case
- User's manual
- Batteries
- Three year limited warranty
- Free technical support

## ***Available Through :***
